SUMMARY

Computer Engineering graduate (AI & ML specialization, June 2026) with a strong foundation in Java and Data Structures & Algorithms (90+ problems solved across LeetCode and CodeChef, entirely in Java). Author of a Springer-published conference paper on an OCR-based mathematics solver. Built and evaluated three applied machine learning projects using Python. Seeking an entry-level Java Developer role to apply strong programming fundamentals and problem-solving skills in a collaborative engineering team.

EDUCATION

- **Bachelor of Engineering (B.E.), Computer Engineering — Artificial Intelligence & Machine Learning**

A.P. Shah Institute of Technology, University of Mumbai | CGPA: 8.22/10 | 2022 – June 2026

HSC — KES Junior College, Maharashtra State Board | 74.33% | 2022

SSC — BES SD Parmar English Medium School, Maharashtra State Board | 83.60% | 2020

PUBLICATION

- **"MathMinds: A Stepwise Solution Generator for Engineering Mathematics Problems Using OCR"** — Accepted & presented, ICETCI 2026 (2nd International Conference on Emerging Technologies and Computing Innovations), March 2026, Springer Nature proceedings (in press; citation pending publication).

TECHNICAL SKILLS

- **Languages:** Java, Python, SQL, JavaScript, HTML, CSS
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming, DBMS
- **Java/Web:** Familiar with React (coursework-level); Flask (Python)
- **ML Libraries:** NumPy, Pandas, Scikit-learn, TensorFlow, Keras, OpenCV
- **Databases:** MySQL; familiar with MongoDB
- **Tools/Cloud:** Git/GitHub, VS Code, Google Colab, AWS (certified), Docker (familiar)

PROJECTS

- **MathMinds — Engineering Mathematics Stepwise Solution Generator (OCR-based)** | Jul 2025 – Apr 2026
- Built a web-based solver covering 24 mathematical models across Mumbai University's M1–M4 syllabus, generating step-by-step solutions for 70+ distinct problem types (Laplace transforms, calculus, trigonometry, linear algebra).
- Implemented core solving logic in Python (SymPy, NumPy, SciPy) with a Flask backend and HTML/CSS frontend; work formed the basis of a paper accepted at ICETCI 2026 (Springer Nature).
- **Vitamin Deficiency Detection from Nail Images — Deep Learning** | Jan 2025 – May 2025
- Built a CNN-based image classification model to detect vitamin deficiencies from nail images, achieving 91% accuracy on a test set of ~1,000–2,000 images.
- Used TensorFlow and Keras for model development and OpenCV for image preprocessing; applied data augmentation to improve generalization on a limited dataset. Evaluated locally (notebook-based).
- **Diabetes Risk Prediction — Machine Learning** | Jul 2024 – Nov 2024
- Trained a Support Vector Machine (SVM) classifier to predict diabetes risk from health indicators (BMI, glucose, etc.), achieving ~88% accuracy on the test set.
- Implemented data preprocessing, feature selection, and evaluation (accuracy, confusion matrix) using Python, Scikit-learn, Pandas, and NumPy. Evaluated locally (notebook-based).

CODING & PROBLEM SOLVING

- Solved 90+ Data Structures & Algorithms problems in Java across LeetCode (34 problems — Arrays, Hash Table, Binary Search, Dynamic Programming, Backtracking) and CodeChef (56 problems; Problem Solver Bronze Badge).

CERTIFICATIONS

- Coursera — Supervised Machine Learning (Andrew Ng, Stanford / DeepLearning.AI), 2025
- Google Cloud — Generative AI Fundamentals, 2025
- AWS Academy Graduate — Cloud Architecting, 2025
- NPTEL — Deep Learning, IIT Ropar

ACHIEVEMENTS & LEADERSHIP

- Qualified GATE (DA) 2026 — Data Science & Artificial Intelligence paper
- 1st Place, EXALT 2023 — coding/innovation competition
- TPO Coordinator, CSE (AI & ML) Student Association (2023–24) — led placement coordination for the department
